Solar Panel Owners — What Do You Wish You Knew Before Installing?

Even if you are installing 3kw solar, Go for bigger inverter. Example,5kw. So, you can upgrade the system by only adding the solar panels instead of complete system.

Groundbreaking study shows how solar panels age after 30 years of use: 'It's an important message to the photovoltaic industry'. Astudy of six, 30-year-old arrays in Switzerland found them to sti...

So now we should add solar panels to every type of shade structure like carports, breezeways, pergolas, awnings, amphitheaters, stadiums, and even buildings!

Are solar panels worth it?

The real issue is how much credit will your utility company give you for solar you generate?

Bought a house with "free" solar panels 1.5 years ago. Just found out \$45K is owed on the panels.

For anyone that comes across this in the future, because I feel like this is happening more and more; do not buy a house with solar panels unless you have the full documentation and paper trail.

What is your biggest regret with solar panels ??

Biggest regret is the solar diverter as we get more for exporting the solar than we do for the equivalent cost of gas.

Why China Built 162 Square Miles of Solar Panels on the World’s Highest Plateau. The Talatan Solar Park produces 17 GW of power at an altitude of 10,000 ft at an energy cost 40% less than coal. The effort is a case study of how China has come...

PV solar won the economics battle. Spending money on any other form of power generation is flushing money down the toilet.

“Just staggering:” China installs 100 solar panels a second as total PV capacity tops 1 terawatt

So like 75% of what the us can generate total, they do in just solar. Wow
