ISO 22965-2:2007**Concrete — Part 2: Specification of constituent materials, production of concrete and compliance of concrete**

ISO 22965-2:2007 applies to concrete for structures cast in situ, pre-cast structures and structural pre-cast products for buildings and civil engineering structures. The concrete can be mixed on-site, ready-mixed concrete or produced in a plant for pre-cast concrete products. ISO 22965-2:2007 applies to concrete ...

ISO 1014-2:2025**Coke — Part 2: Determination of true relative density**

This document specifies the method for determining the true relative density of coke, in relation to water. NOTE "True relative density" varies according to the displacement liquid used.

ISO 7176-1:2014**Wheelchairs — Part 1: Determination of static stability**

ISO 7176-1:2014 specifies test methods for determining the static stability of wheelchairs. It is applicable to manual and electrically powered wheelchairs, including scooters, with a maximum speed not greater than 15 km/h, intended to provide indoor and/or outdoor mobility for one disabled person whose mass is ...

Standard

ISO 8871-4:2006**Elastomeric parts for parenterals and for devices for pharmaceutical use — Part 4: Biological requirements and test methods**

ISO 8871-4:2006 specifies biological requirements for elastomeric parts for parenterals and for devices for pharmaceutical use. It also specifies the test methods, i.e. it offers the extraction procedures for elastomeric parts, and it makes reference to relevant biological test ...

ISO 8871-5:2025**Elastomeric parts for parenterals and for devices for pharmaceutical use — Part 5: Functional requirements and testing**

This document specifies requirements and test methods for functional parameters of closures used in combination with vials and when pierced by an injection needle. NOTE Functional testing with spikes is specified in ISO 8536-2, ISO 8536-6, ISO 8362-1 and ISO 8362-4.

Standard

ISO 1014-3:2025**Coke — Part 3: Determination of porosity**

This document specifies the method for the determination of the porosity of the coke.

Published

Standard

ISO 7176-21:2025**Wheelchairs — Part 21: Requirements and test methods for electromagnetic compatibility of electrically powered wheelchairs and scooters, and battery chargers**

This document specifies requirements and test methods for electromagnetic emissions and for electromagnetic immunity of electrically powered wheelchairs and scooters, intended for indoor or outdoor use, or both, by people with disabilities. It is also applicable to manual wheelchairs with an add-on power kit. It ...

Standard

ISO 7176-8:2014**Wheelchairs — Part 8: Requirements and test methods for static, impact and fatigue strengths**

ISO 7176-8:2014 specifies requirements for static, impact, and fatigue strength of wheelchairs including scooters. It specifies the test methods for determining whether the requirements have been met. It also specifies requirements for disclosure of the test results. The test methods can also be used to verify the ...

Standard

ISO 1014-1:2025**Coke — Part 1: Determination of apparent relative density**

This document specifies the method for the determination of the apparent relative density of coke, i.e. the ratio of the mass of a volume of dry coke to the mass of an equal volume of water.

Published

Standard

ISO 8871-3:2003**Elastomeric parts for parenterals and for devices for pharmaceutical use — Part 3: Determination of released-particle count**

Elastomeric closures may be superficially contaminated with visible and subvisible particles, and fragments can also be produced when the closure is pierced by a needle. Such particles may be transferred to pharmaceutical preparations in contact with the elastomeric parts and affect the quality of ...
